Hi Barbara!

I will look up the article. As for notes, I didn't take notes with the expectation that I would finalize and send to the group. Because you asked that no Office Directors were present, I took notes for follow up with staff that weren't permitted in the meeting and to provide specific follow up to NWTCC.

The key pieces of follow up from the meeting:

I sent Darise a note after the meeting with the name of the new community involvement coordinator. I also let her know because of the comment period for Portland Harbor, the Portland Harbor team is looking into whether they need to add the previous NWTCC letter and any comments on Portland Harbor from the meeting into the formal docket. I will find out what they decide next week and follow up with Darise.

In regards to the Bunker Hill Site, the next steps were to for you to send additional information on children's blood lead levels (thank you!). I have shared both letters with Sheryl and my summary notes on the concerns you shared with Dennis about the repository and the need for a community childrens health clinic, and I will also provide her with the articles (I will also share with Dennis). Sheryl has been out of the office, but I will check in with her on how she would like to follow up. At that point, her scheduler would be setting something up.

I didn't take notes during the conversation with Cami. Because the conversation focused on past discussions from Basin Commission meetings and because Cami no longer works directly on the site and hasn't for a number of years, it seems the best way to follow up would be to focus on the on the concerns in your current two letters.

Finally, I will check in with Patty Martin; since she wasn't able to be at the meeting, we will find separate time for her to meet with EPA.

Please let me know if I've left anything out of this summary.

Have a nice weekend!

Kendra

Hi Kendra,

Will fax the flooding, 160 metric tons of lead washed downstream from the Old Mission repository story as for the full Johns Hopkins study it would be accessible from your office.

Barbara Miller

Also we are wanting to know when the notes from the meeting on Aug. 5 will be sent?

Hi Barbara-
Yes, please either scan and email the information or fax it. My fax number is 206-553-1809.
Thank you!
Kendra

Hi Kendra,
No attachments were sent, just references to the two sources of documentation.
They should be easily available by google or the sources listed.
If necessary I can fax them?
Thank you,
Barbara

Thank you Barbara-
I don't think there were attachments in the first email, could you please resend?
Thanks!

Hi Kendra,
I was just informed that Mr. McLerran's name was spelled wrong in the first email. It is now corrected!
Thank you,
Barbara

Hi Kendra,

Thank for arranging the meeting of Reg Administrator McClerran on behalf
of community env. justice leaders on Aug. 5.

SVCRC would like to share a couple of pieces of valuable documentation, pertaining
to the acknowledgement of Mr. McClerran in not being aware of the serious violations of

protecting the environment and human health at the Bunker Hill site.

The first piece pertains to the 160 metric tons of lead washed downstream from the Mission and likely other repositories in the Upper Basin, i.e. epicenter of the superfund site, March 7, 2011, Spokesman Review and CDA News story, submitted by the Kootenai Environmental Alliance, CDA, " January Flooding May Have Caused the Worst CDA Basin Contamination in Years".

The second piece "Ethical Issues in Using Children's Blood Lead Levels as a Remedial Action Objective" A study by Johns Hopkins University which to this day indicates the emergency situation of the lead exposures
Still going on in the nations largest lead Superfund site.

Resolve for both of these issues have been strongly supported by the affected citizens of the Bunker Hill superfund site and have been ignored by epa staff mentioned at our meeting.

Sincerely,
Barbara Miller/SVCRC director
